NEW 24V CONTINUOUS LED FILAMENT LIGHTING

A continuous light source. No dots visible !

- Pluggable segments available in sections of 100 or 50 mm. Diameter: 3 mm
- Fixture length available from 50mm up to 1000mm.
- Embedded current and temperature regulators
- Excellent light quality with high CRI; High efficiency.
- Dimmable by 24V PWM power supply
- Power: 3W/100mm segment
- Available CCTs : 1800K / 2200K / 2500K / 2700K / 3000K / 3500K / 4000K / 5000K / 6000K

A considerable technological challenge having required years of research and 4 patent applications. This miniature continuous LED source was specially developed to get rid of any points.

This rod of only **5 mm diameter** having a flux of **3000 lm/m**, a **CRI of up to 96** makes it a genuinely unique product on the market.

The light distribution is truly homogeneous over it's **180° angle** (can be restrained) and has no yellow fringes.

There are multiple opportunities and applications : jewelers, luxury retailers, shelves, display windows, museums, minimalist light fittings.

Different assembling accessories are available:

Plug-in bases

Magnetic
*for fixation and power supply insulated or not.*

TinyLig

Brackets
